This document, a photostat of a booklet, furnishes detailed information on the 1953 organizational setup of GDR material planning and includes an index of claimant agencies (Kontingentträger - primary recipients of allocations of materials). The booklet was issued in May 1952 by the Main Department for Material Planning of the GDR Government's State Administration for Materials Supply.

Definite regulations and channels are established through which materials are to be allocated. The numerical symbols for each claimant agency and its subsections are also given. The index does not apply to the allocations of the following plan groups: power and foodstuffs industries.

This document ~~contains significant information~~ ^{appears to give} an over-all picture of the GDR material planning organization.
